

## Hosted Exchange

Microsoft Exchange 2013  
business-class email service

### Enterprise level email service

Unlock the benefits of business-class email services without the operational cost of managing your own email server.

Microsoft lead the way in email services, which is why IT-Logik has chosen to deliver Microsoft Hosted Exchange to companies around the world. Just choose the package that best suits your business requirements and we can have your emails up and running within hours.

Hosted Exchange seamlessly works with Microsoft Outlook and any mobile device compatible with Exchange or ActiveSync. Your emails, contacts and calendars are synchronised across all devices. You can add or update a contact or calendar item in one location and this will automatically synchronise with all other devices and Outlook.

- **50GB mailboxes**
- **Seamlessly works with Microsoft Outlook**
- **Works on all mobile smart devices**
- **Stay in sync between multiple devices**
- **Advanced webmail**
- **Bolt-on email security and signatures**
- **Managed through an easy to use web panel**

## EMAIL SECURITY

Simply bolt on our hosted email security services, a leading business anti-spam filter, protecting your business against viruses, malware, phishing, and SPAM emails before they even reach the end users mailbox.

Comes with an easy-to-use web control panel to manage your domain and spam emails, with the option to whitelist or blacklist. You can also set up email reports, which will be sent to a designated user's inbox, indicating the emails that have been blocked.

## EMAIL SIGNATURES MADE SIMPLE

No need to setup an email signature for every user on every device. You can also benefit from consistent signatures on all emails with auto-completed details like names, departments, job titles and contact number all pulled from Active Directory .

Edits are made to the template, and all your users' signatures will be updated automatically.

## COMPLETE CONTROL

Using the web control panel enables you to manage your Hosted Exchange environment, where you can create, update and delete mailboxes as and when.

This also includes the ability to reset passwords, set full access permissions and more.

### NEXTCLOUD INCLUDED

Hosted Exchange mailboxes come with a free Nextcloud account.

Nextcloud is the most straightforward way to file sync and share your data between multiple devices, either via the Nextcloud app or a web browser.

### GDPR & HOSTING

GDPR (General Data Protection Regulation) is a piece of EU legislation that came into effect on the 25<sup>th</sup> May 2018 for all EU countries.

Its core aim is to establish a set of rules that define how we protect someone's data. A lot of the regulations in GDPR are very similar to those found under the data protection act. It only applies to you if you handle an EU citizens data.

IT-Logik (the 'controller') follows GDPR rules as far as delivering a hosted environment whereas the customer (the 'processor'), is the owner and controller of the data held on the hosted platform.

More information can be obtained via our legal page: <https://www.it-logik.com/>
